PROFESSIONAL SUMMARY

Fifth-semester Informatics Engineering student specializing in software engineering, system analysis, and IT governance. Experienced in documenting enterprise business workflows (SOP, ITGC, SAP) within the telecommunications industry, alongside strong technical competencies in developing scalable web and mobile applications using RESTful APIs, Flutter, Laravel, and MySQL. Proven track record of agile collaboration via Git/GitHub with a solid orientation toward system security and operational efficiency.

WORK EXPERIENCE

IT Analyst (Intern) | PT Telkom Infrastruktur Indonesia (Telkominfra) Aug 2026 – Present

- Designed and formulated IT division Standard Operating Procedures (SOP) to standardize operational workflows and improve organizational efficiency.
- Mapped business processes and system architectures for enterprise SAP modules using flowcharts to ensure cross-departmental data integrity.
- Evaluated and documented IT General Controls (ITGC) to enforce compliance with IT governance standards, risk management, and data access security.
- Partnered with internal IT teams to identify process bottlenecks and provide actionable recommendations for workflow optimization.

Freelance Web Developer | PT Dinamika Mitra Hiresindo Apr 2026 – Jun 2026

- Developed a centralized HRIS application using Laravel & MySQL to manage employee records, leave approvals, evaluations, and pre-payroll workflows.
- Implemented Role-Based Access Control (RBAC) to protect sensitive data and built dynamic, reactive interfaces with Livewire and Tailwind CSS.

FEATURED PROJECTS

Scrum Management App (Flutter, Dart, PHP, MySQL) Aug 2025 – Dec 2025

- Engineered responsive cross-platform frontend interfaces with Flutter (Dart) to facilitate agile collaboration and team task tracking.
- Built RESTful backend APIs with PHP and architected MySQL schemas to support multi-user roles, sprint management, and account notifications.

Web-Based Inventory & Shop Management System (PHP, MySQL) Sep 2024 – Jan 2025

- Designed an automated inventory and point-of-sale recording system, eliminating manual stock discrepancies and boosting operational flow.
- Implemented secure user authentication and granular stock management modules using structured PHP and relational MySQL queries.

EDUCATION

Jakarta Global University — B.S. in Informatics Engineering Sep 2024 – Present

- Focus: Software Engineering, Web/Mobile Architecture, Relational Database Design.

Universitas Airlangga — Information Systems (*Relevant Coursework / Exchange*) Aug 2025 – Dec 2025

- Focus: Information Systems Modeling, Business Process Analysis, and Collaborative Software Development.

SKILLS & LANGUAGES

- IT Governance & Analysis:** IT General Controls (ITGC), Standard Operating Procedures (SOP), SAP Environment, Process Modeling (Flowchart, BPMN), RESTful API Architecture.
- Programming & Frameworks:** PHP, Laravel, JavaScript, TypeScript, Flutter (Dart), React.js, Next.js, Node.js, HTML5, CSS3, Tailwind CSS.
- Databases & Tools:** MySQL, SQLite, Git/GitHub, Draw.io, Bizagi Modeler, VS Code, Android Studio, Laragon, XAMPP.
- Languages:** Indonesian (Native), English (Intermediate), Arabic (Intermediate).

VOLUNTEER EXPERIENCE

Ticket Scanning Volunteer | FIFA World Cup Qualifiers & AFF Championship Mar 2025 – Jul 2025

- Facilitated high-volume digital ticket validation and spectator access control at Gelora Bung Karno Stadium with zero admission discrepancies.
